

Practical No. 5

Aim : Write and test a program to update 10 student records into tables into Excel files.

1. Create new java Project also create 2 excel file students with record and one Result blank file.

2. Download the zip file of jexcelapi_2_6_12 and extract that zip file.

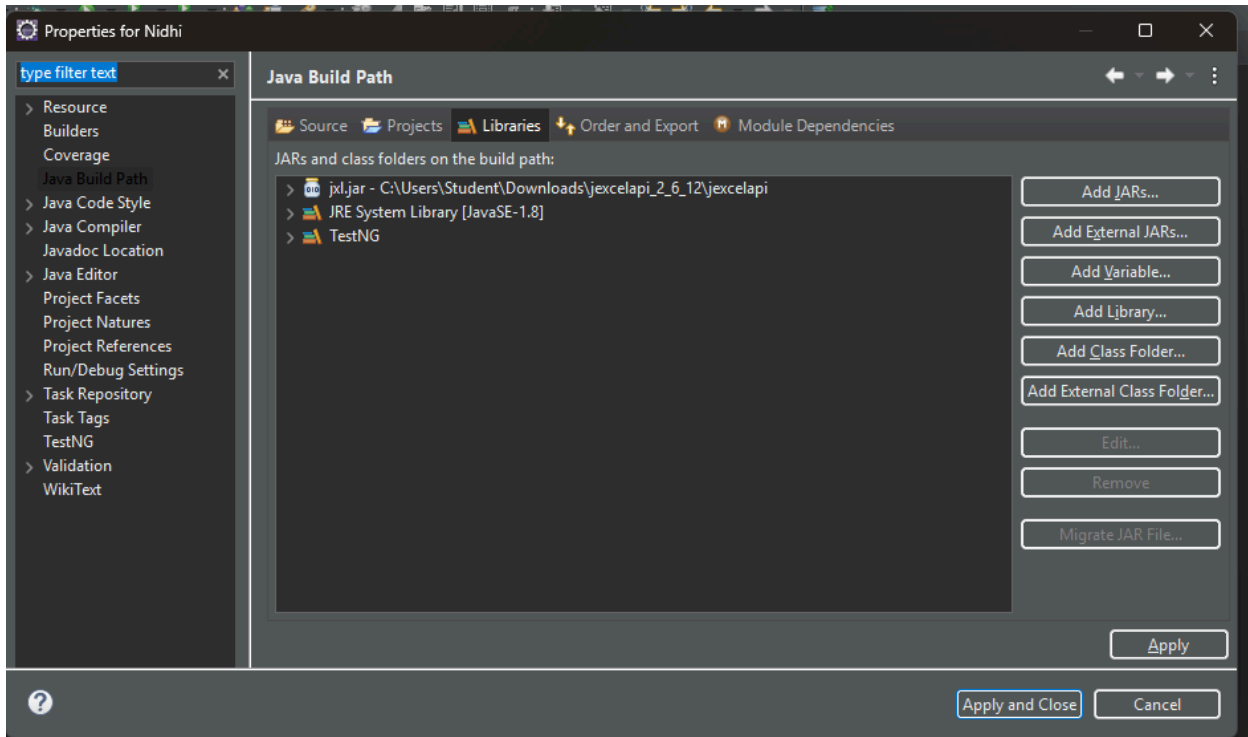

Name	Date modified	Type	Size

3. Add that jar file in libraries.

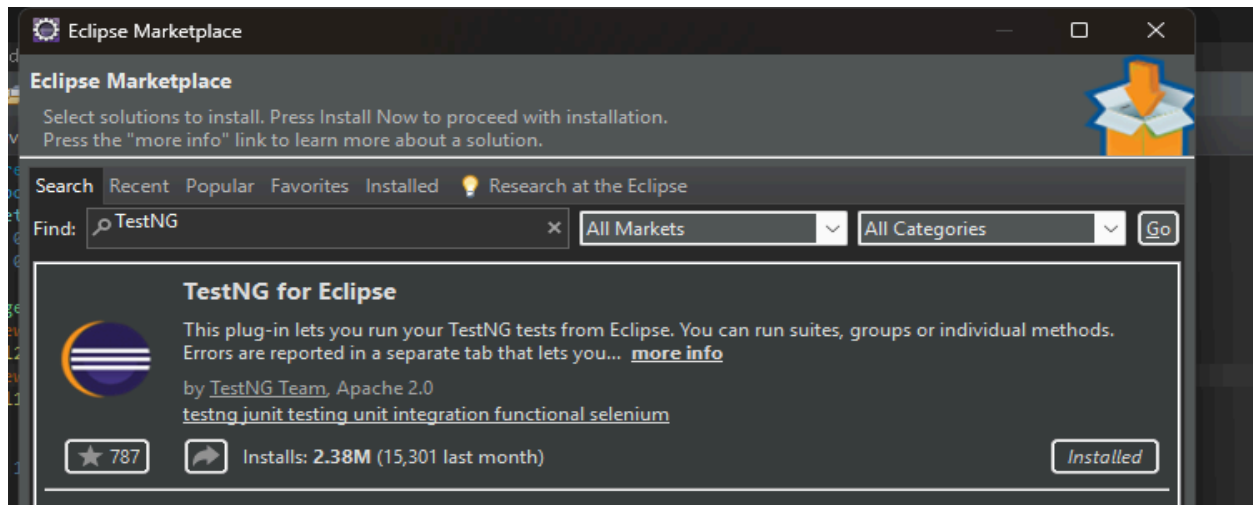

4. Create a new java class without a package name.

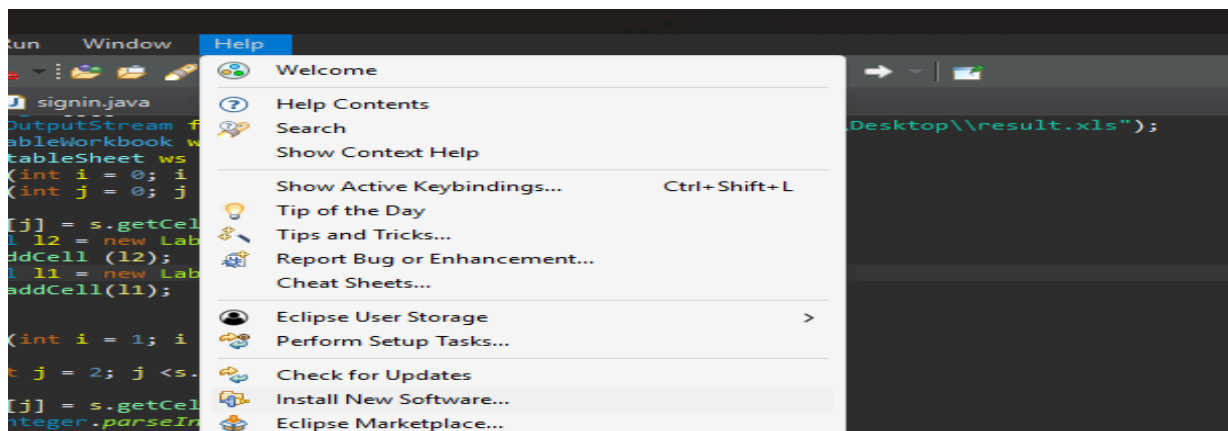

5. write the code and go to the help → Eclipse Marketplace.

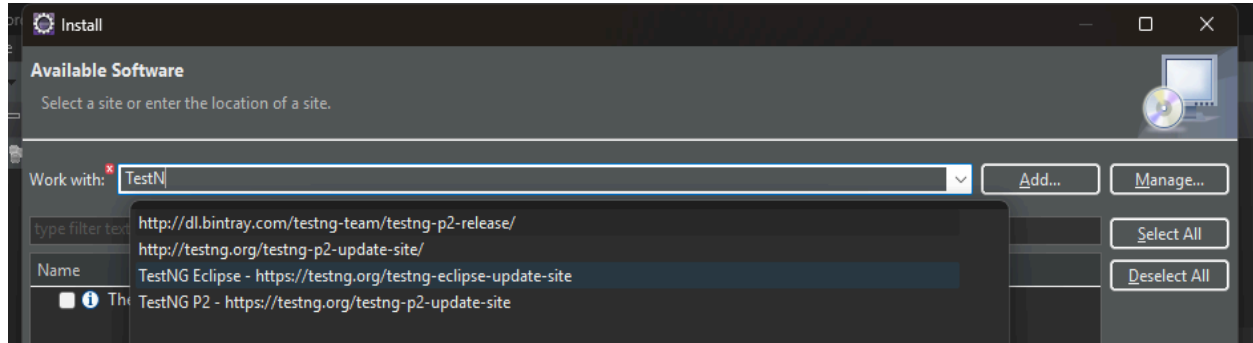

6. Then search for TestNG Click on Install.

7. Go to the help → Install New Software.

8. Select TestNG Eclipse- <https://testng.org/testng-eclipse-update-site>.**CODE :**

```

import jxl.write.Label;
import jxl.write.WritableSheet;
import jxl.write.WritableWorkbook;
import java.io.*;
import jxl.*;
import org.testng.annotations.*;
import org.testng.annotations.BeforeClass;

public class Student_Record {
    @BeforeClass //@BeforeClass runs once before the entire test.
    public void setUp() throws Exception{}

    @Test
    public void testImportexport1() throws Exception {
        FileInputStream fi = new FileInputStream("C:\\Users\\Student\\Desktop\\Student.xls");
        Workbook w = Workbook.getWorkbook (fi);
        Sheet s=w.getSheet(0);
        String a[][] = new String[s.getRows()][s.getColumns()];
        FileOutputStream fo = new FileOutputStream("C:\\Users\\Student\\Desktop\\result.xls");
        WritableWorkbook ww = Workbook.createWorkbook (fo);
        WritableSheet ws = ww.createSheet ("result1", 0);
        for (int i = 0; i < s.getRows(); i++)
            for (int j = 0; j < s.getColumns(); j++)
            {
                a[i][j] = s.getCell(j, i).getContents();
                Label l2 = new Label (j, i, a[i][j]);
                ws.addCell (l2);
                Label l1 = new Label (6, 0, "Result");
                ws.addCell(l1);
            }
        for (int i = 1; i < s.getRows(); i++)

```

Roll No.: 9079

OUTPUT :

A screenshot of an IDE's code editor. The code shows imports for JXL and TestNG. Line 7: `import org.testng.annotations.*;` Line 8: `import org.testng.*;` A tooltip is visible over line 7, containing the following options:

- Add TestNG library
- Remove unused import
- Organize imports

 To the right of the code editor, a yellow note box contains the text: "Add the TestNG library to the project's build class path".

```
<terminated> Student_Record [TestNG] C:\Users\Student\p2\pool\plugins\org.eclipse.justj.openjdk.hotspot.jre.full.win32.x86_64_17
[RemoteTestNG] detected TestNG version 7.11.0
