

Practical No 4

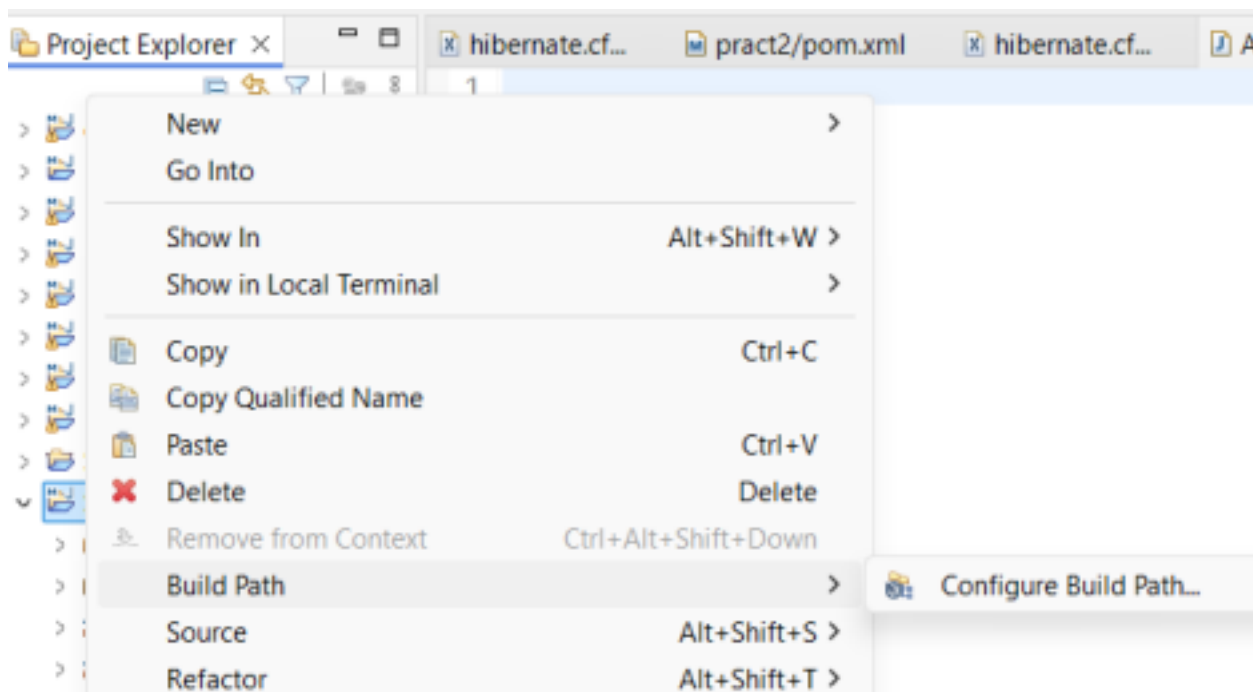

AIM: Write and test a program to login to a specific web page.

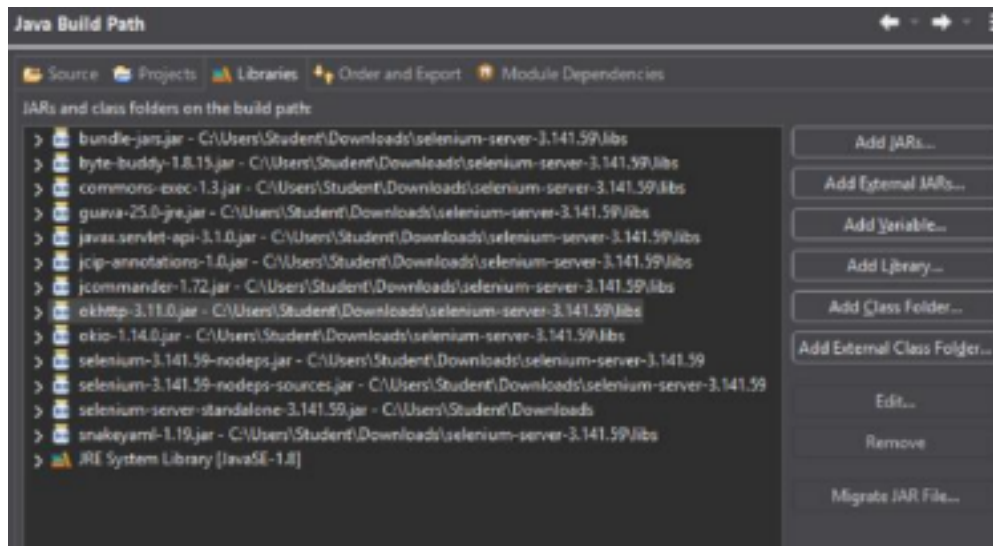

Part 1: Using Dummy Website.

Step 1: Install Selenium Server 3.141.59, selenium-server-standalone, geckodriver and extract all of them.

Step 2: Open Eclipse. Create a new java project. Add jar files.

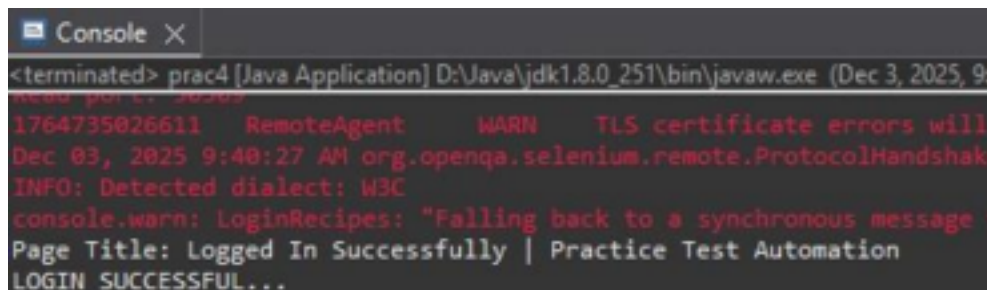

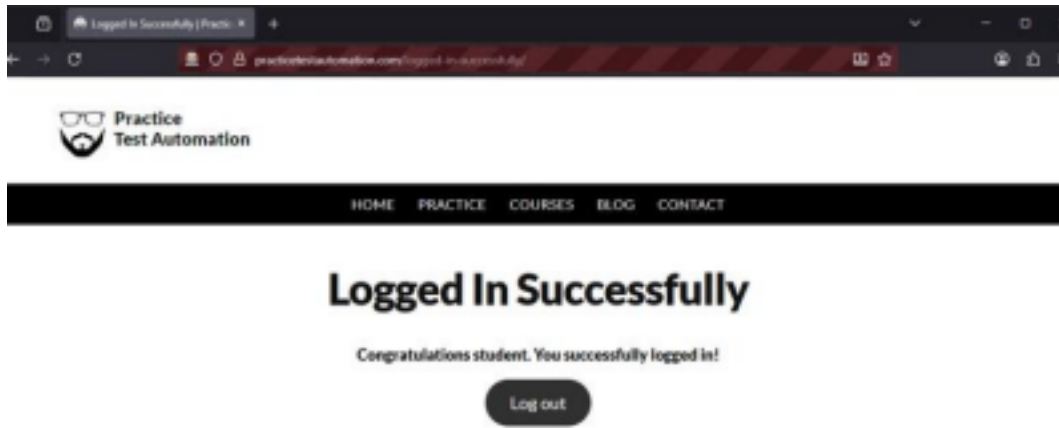

```
package st04;
import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.firefox.FirefoxDriver;
public class prac4 {
    public static void main(String[] args) {

        System.setProperty("webdriver.gecko.driver",
"C:\\Users\\Student\\Downloads\\geckodriver-v0.34.0-win32\\geckodriver.exe");
        WebDriver driver = new FirefoxDriver();
        driver.get("https://practicetestautomation.com/practice-test-login/");
        driver.findElement(By.id("username")).sendKeys("student");
        driver.findElement(By.id("password")).sendKeys("Password123");
        driver.findElement(By.id("submit")).click();

String title = driver.getTitle();
System.out.println("Page Title: " + title);
if (title.contains("Logged In Successfully")) {
System.out.println("LOGIN SUCCESSFUL...");
} else {
System.out.println("LOGIN FAILED");
} driver.quit();
    }
}
```

(For wrong

password)

```
package pract04;
import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.firefox.FirefoxDriver;

public class st04 {

    public static void main(String[] args) {

        System.setProperty("webdriver.gecko.driver",
            "C:\\Users\\Student\\Downloads\\geckodriver.exe");
        WebDriver driver = new FirefoxDriver();
        driver.get("https://practicetestautomation.com/practice-test-login/");
        driver.findElement(By.id("username")).sendKeys("student");
        driver.findElement(By.id("password")).sendKeys("Password1");
        driver.findElement(By.id("submit")).click();

        String title = driver.getTitle();
        System.out.println("Page Title: " + title);
    }
}
```

```
if (title.contains("Logged In Successfully")) {  
    System.out.println("LOGIN SUCCESSFUL...");  
} else {  
    System.out.println("LOGIN FAILED");  
} } }
```

Use next credentials to execute Login:
Username: **student**
Password: **Password123**

Page Title: Test Login | Practice Test Automation  
LOGIN FAILED
```

Part 2: By creating a login page.

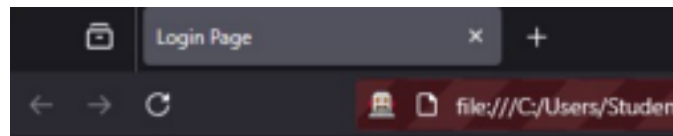

Follow 2 steps as part 1. Step 3: Create a html file. login.html

```
<!DOCTYPE html>  
<html>  
<head>  
<meta charset="UTF-8">  
<title>Login Page</title>  
<script>  
function checkLogin() {  
    var user = document.getElementById("username").value;  
    var pass = document.getElementById("password").value;  
    var msg = document.getElementById("msg");  
    if (user === "student" && pass === "Password123") {  
        msg.innerHTML = "Login Successful!";  
    } else {
```

```

msg.innerHTML = "Login Failed!";
}
}
</script>
</head>
<body>
<h2>Login Form</h2>
<label>Username:</label><br>
<input type="text" id="username" placeholder="Enter username"><br><br>
<label>Password:</label><br>
<input type="password" id="password" placeholder="Enter password"><br><br>
<button id="loginBtn" onclick="checkLogin()">Login</button>
<p id="msg"></p>
</body>
</html>
package st04;
import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.firefox.FirefoxDriver;
public class prac4 {
    public static void main(String[] args) {
        System.setProperty("webdriver.gecko.driver",
"C:\\Users\\Student\\Downloads\\geckodriver-v0.34.0-win32\\geckodriver.exe");
        WebDriver driver = new FirefoxDriver();
        driver.get("file:///C:\\Users\\Student\\eclipse-workspace\\st04\\login.html");
        driver.findElement(By.id("username")).sendKeys("student");
        driver.findElement(By.id("password")).sendKeys("Password123");
        driver.findElement(By.id("loginBtn")).click();
        try { Thread.sleep(2000);
        } catch (Exception e) {}
        String result = driver.findElement(By.id("msg")).getText();
        if (result.equals("Login Successful!")) {
            System.out.println("LOGIN SUCCESSFUL (LOCAL PAGE)...");
        } else {
            System.out.println("LOGIN FAILED...");
        } driver.quit(); } }
